

The Colorado Health Access Survey – the CHAS – is the premier source of information on health insurance coverage, access to health care, and how health care is used in Colorado. Findings from the 2013 CHAS are now available, giving a detailed picture of Colorado’s changing health landscape.

CHAS Data on the Web

New This Year:

- More than 200 tabulated tables of CHAS data available online.
- Trendable data from the 2009, 2011 and 2013 surveys available online.
- Survey tool available online.

As Always:

- Public Use File available with email registration.
- Research File available with application approval.
- Individual data requests through the Colorado Health Institute.

CHAS: The Basics

Insurance: How many people are uninsured and why do they lack coverage?

Access: Who has trouble getting an appointment, even with insurance?

Use of Care: Where do Coloradans get their health care? How often do they use that care?

Affordability: Do people go without care due to cost? What are people willing to pay for insurance?

Health Status: How do Coloradans rate their physical, mental and oral health?

.....

Data Example: Poor mental health days by gender, income, age, type of insurance, general health status, education, employment, ethnicity, emergency department use and usual source of care.
