A special focus on safety net providers or their representatives:

- Are you seeing an increase of patients involved in the justice system? Do you know when someone is involved with the criminal justice system?
 - Is there fear or stigma around this population?
 - What challenges or barriers do these patients face? What are their needs?
 - What arrangements — if any — have you made with criminal justice agencies to ensure access to care for this population?
5. Wrap-Up and Adjourn

Learning Lab Objectives:

- Leverage the collective focus of a wide variety of stakeholders on the health needs of vulnerable Coloradans.
- Provide a forum to identify innovative approaches, promising practices, challenges and lessons learned.
- Provide SNAC Lab participants, as well as the wider safety net community, with the latest strategies for using data to measure the effectiveness of various models.
- Synthesize input from the SNAC Labs and develop a shared body of knowledge for state health policy leaders, future initiatives and other states about timely and important issues facing Colorado's health care safety net.
